EVOLUTION OF MONEY

Money has evolved over time from simple bartering systems to the sophisticated financial systems we have today. Here is a brief overview of the evolution of money from its early beginnings to the present day.

BARTERING SYSTEM

Before money, people traded goods and services through bartering.

Example: a farmer exchanging crops for the blacksmith's tools.

COMMODITY MONEY

Commodity money emerged to make trading more efficient.

This type of money is a physical item that has value in itself, like gold or silver.

METALLIC MONEY

In the 6th century BC, the Lydians in Asia Minor started using coins made of precious metals like gold, silver, and bronze.

EVOLUTION OF MONEY

PAPER MONEY

The first paper money was issued in China in the 7th century AD. This paper money was backed by precious metals.

CRYPTOCURRENCY

Cryptocurrencies are a type of digital currency that use encryption techniques to secure transactions and control the creation of new units.

BANKNOTES

Banknotes were first issued by private banks in Europe during the 17th century. Initially backed by gold and silver.

TODAY'S FINANCIAL SYSTEM

Today, we have a complex financial system that includes a variety of different types of money, such as cash, checks, credit cards, and cryptocurrencies.

ELECTRONIC MONEY

Electronic money, or e-money, is a digital currency. Examples include credit cards, debit cards, and mobile payment apps.

Each of these forms of money has its advantages and disadvantages, and the use of each varies depending on the situation and the preferences of the individual or business involved.

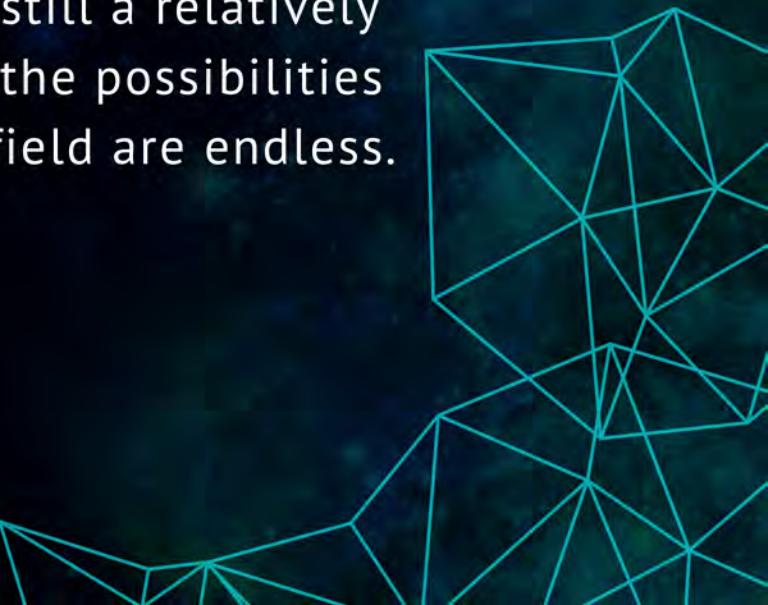

ABOUT CRYPTOCURRENCY

Cryptocurrency is a digital or virtual currency that uses cryptography for security and operates independently of any central authority. It is built on a decentralized network and allows for peer-to-peer transactions without intermediaries. Cryptocurrencies use blockchain technology to create an immutable and transparent record of all transactions, making them secure and transparent. They offer benefits such as lower transaction fees, faster transaction times, global accessibility, financial inclusion, and investment opportunities. While cryptocurrency is still a relatively new technology, it has the potential to disrupt traditional financial systems and change the way we transact value in the future.

BENEFITS OF CRYPTOCURRENCY

01

DECENTRALIZATION

Cryptocurrencies are decentralized, meaning they operate independently of governments or financial institutions.

02

GLOBAL ACCESSIBILITY

Cryptocurrencies can be accessed and used by anyone with an internet connection, regardless of their location.

03

INVESTMENT OPPORTUNITIES

Cryptocurrencies can be a valuable investment opportunity for those looking to diversify their portfolio.

04

FINANCIAL INCLUSION

Cryptocurrencies can help provide financial services to people who may not have access to traditional banking services.

05

LOW TRANSACTION FEES

Cryptocurrencies have lower transaction fees compared to traditional banking fees.

06

INNOVATION

Cryptocurrencies are still a relatively new technology, and the possibilities for innovation in the field are endless.

CRYPTO MARKET STATISTICS

Cryptocurrencies have seen tremendous growth in recent years, with the total market capitalization reaching over \$2.5 trillion in 2021, up from just \$17.7 billion in 2017. This growth has been fueled by increased adoption and mainstream acceptance, as well as investment from institutional investors. The development of new use cases such as DeFi and NFTs has also propelled the industry forward. Despite regulatory challenges and volatility, the trend of growth and adoption is expected to continue as more businesses and individuals recognize the benefits and opportunities offered by cryptocurrencies.

ABOUT METAVERSE

The Metaverse is a revolutionary technology that offers a fully immersive and interactive virtual reality experience. Users can create their own avatars, explore virtual worlds, socialize with others, attend events, play games, and engage in commerce. This cutting-edge technology is still in its early stages of development, but it has already attracted investment from major companies and has the potential to transform the way we interact with each other and with digital content. The Metaverse is expected to become a reality in the near future, ushering in a new era of immersive and engaging experiences that will revolutionize the way we live, work, and play in the digital world.

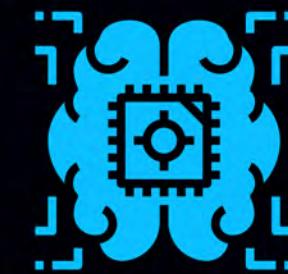

FAIRY METAVERSE ECOSYSTEM

INTERCONNECTED PLATFORM

The Fairy Metaverse Ecosystem is an interconnected platform that includes multiple decentralized applications (dApps) and services. This allows users to seamlessly navigate between different parts of the ecosystem and enjoy a unified experience.

COMMUNITY-DRIVEN GOVERNANCE

The Fairy Metaverse Ecosystem is governed by its community of users through a decentralized governance model. This ensures that important decisions are made by the people who are most invested in the platform's success, and that the ecosystem evolves in a way that benefits its users.

TOKEN ECONOMY

The ecosystem has its own native token, the FMC Token, which is used as a medium of exchange and a store of value within the platform. Users can use FMC Tokens to access various services, purchase virtual assets, and participate in governance and decision-making.

INNOVATION AND GROWTH

The Fairy Metaverse Ecosystem is designed to foster innovation and growth in the blockchain and virtual reality industries. By providing a platform for developers, creators, and entrepreneurs to build and launch new projects, the ecosystem is helping to drive the adoption and mainstream acceptance of these emerging technologies.

FMC TOKEN

Token Platform

Binance Smart Chain

Symbol Name

FMC

Max supply

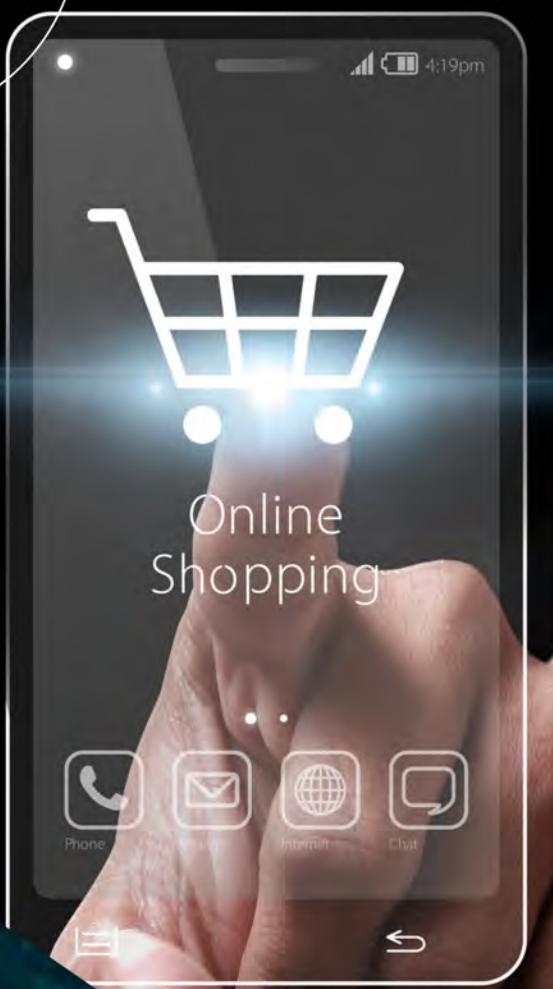

100,000,000

FMC Token is a cryptocurrency built on the Binance Smart Chain using the BEP-20 token protocol. As the native token of the Fairy Metaverse ecosystem, it serves as a medium of exchange and store of value for users within the platform. FMC can be used to purchase virtual land, goods, and services within the Metaverse, as well as participate in community governance and decision-making processes. The token is designed to be deflationary, with a maximum supply of 100 million and regular burn events to decrease the circulating supply over time. FMC Token also offers staking and yield farming opportunities, allowing users to earn rewards for providing liquidity and participating in the ecosystem.

ONLINE SHOPPING MALL

The online shopping mall application in Fairy Metaverse is a state-of-the-art e-commerce platform that allows users to browse and purchase products from a wide range of merchants. The platform is designed to be user-friendly and intuitive, with features like personalized recommendations, easy checkout, and secure payment processing. The application is integrated with the FMC Token, allowing users to make purchases using the cryptocurrency.

OTT PLATFORM

The OTT (Over-The-Top) platform in Fairy Metaverse is a streaming service that provides users with access to a wide range of movies, TV shows, and other video content. It uses advanced streaming technology to deliver high-quality video content to users, and it is designed to be fast, reliable, and easy to use. The platform also includes features like personalized recommendations, user profiles, and social sharing, making it a truly immersive entertainment experience.

3D NFT METAVERSE GAME

The 3D NFT Metaverse Game in Fairy Metaverse is a cutting-edge gaming platform that allows users to enter a fully immersive virtual world where they can interact with other players, explore new environments, and complete quests and challenges. The game uses NFTs (Non-Fungible Tokens) to provide unique and collectible in-game items, such as weapons, armor, and special abilities, which players can use to enhance their gaming experience. The game is built on the latest blockchain technology, providing users with a secure and transparent gaming environment.

CRYPTO CURRENCY EXCHANGE

The crypto currency exchange in Fairy Metaverse is a platform that allows users to buy, sell, and trade cryptocurrencies like Bitcoin, Ethereum, and FMC. The exchange is built on the latest blockchain technology, providing users with a secure and transparent trading environment. It is designed to be user-friendly, with features like advanced charting, real-time market data, and customizable trading interfaces. The exchange is integrated with the FMC Token, allowing users to trade cryptocurrencies using the Fairy Metaverse's native cryptocurrency.
